S P E C I F I C A T I O N S

3½ LITRE TYPE XK 120 MODEL 2 LITRE TYPE XK 100 MODEL

ENGINE. Six cylinder 3½ litre Jaguar engine 70° twin overhead camshafts driven by a two-stage duplex roller chain; 83 mm. bore × 105 mm. stroke; 3,442 c.c. developing 165 b.h.p. at 5,000 r.p.m.; large non-adjustable directly operated valves and austenitic cast iron seats; compression ratio 7 or 8:1; high grade chrome iron cylinder block, cooling by pump circulation with by-pass thermostat control; cylinder head of high tensile aluminium alloy with spherical combustion chambers; aluminium alloy pistons; steel connecting rods; forced lubrication throughout by submerged pump with full flow filter and floating gauze intake; twin S.U. horizontal carburettors with electrically controlled automatic choke; 2½ ins. diameter counterweighted crankshaft carried in seven large steel backed precision bearings.

FRAME. Straight plane steel box section frame of immense strength, torsional rigidity ensured by large box section cross members, over 3½ ins. thick top. Gear ratios: 1st 12.23; 2nd 7.22; 3rd 4.93; top 3.64. Optional axle ratios: 3.27, 4.0, 4.3. Hardy Spicer propeller shaft and needle roller bearings, Borg & Beck 9 ins. diameter single dry plate clutch, central gear lever with remote control.

SUSPENSION. Independent front suspension incorporating transverse wish-bones and long torsion bars with telescopic type hydraulic shock absorbers. Rear suspension by long silico-manganese steel half elliptic springs controlled by Girling PV.7 hydraulic shock absorbers. Rear springs totally enclosed in gauges fitted with grease nipples.

BRAKES. Lockheed full hydraulic two-leading-shoe front and 12 ins. drums, friction lining area 208 square inches. Front drums fitted with cooling ducts, central fly-off handbrake operating on the rear wheels only through a separate linkage.

STEERING. Burman re-circulating ball type steering, positive and accurate at all speeds, 17 ins. Blumel adjustable wheel. Left or right hand steering optional.

WHEELS AND TYRES. Lockheed full hydraulic two-leading-shoe front and 12 ins. drums, friction lining area 208 square inches. Front drums fitted with cooling ducts, central fly-off handbrake operating on the rear wheels only through a separate linkage.

FUEL SUPPLY. By a new large delivery S.U. electric pump from a 14 gallon rear tank with reserve supply and warning light, petrol filler cap concealed and fitted with lock and key. 25 gallon tank optional.

ELECTRICAL EQUIPMENT. Lucas de luxe throughout, 12 volt 64 amp. capacity, twin batteries with constant voltage controlled ventilated dynamo, 10 lamp discharge, flush fitting head lamps and wing lamps, stop light, reverse light, twin rear lights, panel light, twin blended note horns, twin blade screen wiper, cigar lighter, starter motor, vacuum and centrifugal automatic ignition advance.

INSTRUMENTS. 5 ins. diameter 140 m.p.h. speedometer, 5 ins. diameter revolution counter, ammeter, oil pressure gauge, water thermometer gauge, petrol gauge with warning light, electric clock.

CAR HEATER. An interior car heater can be supplied as an optional extra.

BODY. Aerodynamic two-seater body upholstered throughout in finest quality leather hide, floor is thickly carpeted over felt underlay. A Mono Screen is provided for competition work and is interchangeable with the Touring Screen.

SEATING. Divided seat and squat, folding forward for access to hood and battery, seats adjustable for reach. A tonneau cover is provided.

HOOD. Finest quality mohair material concealed behind seats when folded, fitted with unbreakable rear light. Detachable side screens stored in a tray in the hood compartment.

INTERIOR APPOINTMENTS. Instrument panel and garnish rails finished in first quality leather, capacious pockets in the doors.

Spare Wheel and Tools. The spare wheel is carried beneath the boot floor in a separate compartment and is readily accessible. The tools and jack are carried in a special container fitted to the side of the luggage compartment, and the wheel brace is housed in the spare wheel compartment.

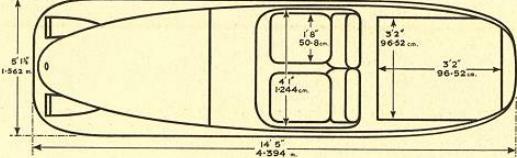

LUGGAGE ACCOMMODATION. Ample accommodation is provided in a capacious rear locker, provided with an automatic light.

EASY JACKING. A central jack on each side of the car raises both wheels simultaneously with the minimum of effort by means of a special easy-lift jack.

PRINCIPAL DIMENSIONS. Wheel base, 8 ft. 6 ins.; track front, 4 ft. 3 ins.; track rear, 4 ft. 2 ins.; overall length (over bumpers), 14 ft. 5 ins. approximately; overall width, 5 ft. 13 ins.; overall height (over hood), 4 ft. 4½ ins.; (over windscreen), 4 ft. 11 ins.; ground clearance, 7½ ins.; unladen turning circle, 31 ft. 0 ins.; dry weight 24 c.wts.

ALTERNATIVE EQUIPMENT. For sporting events an alternative 24 gallon fuel tank and two spare wheels can be supplied.

This is not generally recommended owing to the considerable reduction in luggage accommodation.

ENGINE. Four cylinder 2 litre Jaguar engine 70° twin overhead camshafts driven by a two-stage duplex roller chain, 83 mm. bore × 91 mm. stroke; 1,970 c.c. developing 105 b.h.p. at 5,000 r.p.m.; large non-adjustable directly operated valves and austenitic cast iron seats; compression ratio 7 or 8:1; high grade chrome iron cylinder block, cooling by pump circulation with by-pass thermostat control; cylinder head of high tensile aluminium alloy with spherical combustion chambers; aluminium alloy pistons; steel connecting rods; forced lubrication throughout by submerged pump with full flow filter and floating gauze intake; twin S.U. horizontal carburettors with electrically controlled automatic choke; 2½ ins. diameter counterweighted crankshaft carried in three large steel backed precision bearings.

FRAME. Straight plane steel box section frame of immense strength, torsional rigidity ensured by large box section cross members.

TRANSMISSION. Four-speed single helical synchromesh gearbox, ground teeth gears running on needle bearings, synchromesh on 2nd, 3rd and top. Gear ratios: 1st 13.79; 2nd 8.1; 3rd 5.59; top 4.3. Optional axle ratios: 4.5, 4.0, 3.64. Hardy Spicer propeller shaft in needle roller bearings, Borg & Beck 9 ins. diameter single dry plate clutch, central gear lever with remote control.

SUSPENSION. Independent front suspension incorporating transverse wish-bones and long torsion bars with telescopic type hydraulic shock absorbers. Rear suspension by long silico-manganese steel half elliptic springs controlled by Girling PV.7 hydraulic shock absorbers.

BRAKES. Lockheed full hydraulic two-leading-shoe front and 12 ins. drums, friction lining area 208 square inches. Front drums fitted with cooling ducts, central fly-off handbrake operating on the rear wheels only through a separate linkage.

STEERING. Burman re-circulating ball type steering, positive and accurate at all speeds, 17 ins. Blumel adjustable wheel. Left or right hand steering optional.

WHEELS AND TYRES. Pressed steel bolt-on disc wheels with wide base rim and Dunlop 6.00 ins. × 16 ins. road speed tyres.

FUEL SUPPLY. By a new large delivery S.U. electric pump from a 14 gallon rear tank with reserve supply and warning light, petrol filler cap concealed and fitted with lock and key. 25 gallon tank optional.

ELECTRICAL EQUIPMENT. Lucas de luxe throughout, 12 volt 64 amp. capacity twin batteries with constant voltage controlled ventilated dynamo, 10 lamp discharge, flush fitting head lamps and wing lamps, stop light, reverse light, twin rear lights, panel light, twin blended note horns, twin blade screen wiper, cigar lighter, starter motor, vacuum and centrifugal automatic ignition advance.

INSTRUMENTS. 5 ins. diameter 120 m.p.h. speedometer, 5 ins. diameter revolution counter, ammeter, oil pressure gauge, water thermometer gauge, petrol gauge with warning light, electric clock.

CAR HEATER. An interior car heater can be supplied as an optional extra.

BODY. Aerodynamic two-seater body upholstered throughout in finest quality leather hide, floor is thickly carpeted over felt underlay. A Mono Screen is provided for competition work and is interchangeable with the Touring Screen.

SEATING. Divided seat and squat, folding forward for access to hood and battery, seats adjustable for reach. A tonneau cover is provided.

HOOD. Finest quality mohair material concealed behind seats when folded, fitted with unbreakable rear light. Detachable side screens stored in a tray in the hood compartment.

INTERIOR APPOINTMENTS. Instrument panel and garnish rails finished in first quality leather, capacious pockets in the doors.

Spare Wheel and Tools. The spare wheel is carried beneath the boot floor in a separate compartment and is readily accessible. The tools and jack are carried in a special container fitted to the side of the luggage compartment, and the wheel brace is housed in the spare wheel compartment.

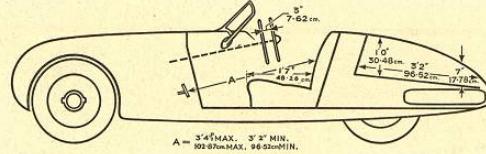

LUGGAGE ACCOMMODATION. Ample accommodation is provided in a capacious rear locker, provided with an automatic light.

EASY JACKING. A central jack on each side of the car raises both wheels simultaneously with the minimum of effort by means of a special easy-lift jack.

PRINCIPAL DIMENSIONS. Wheel base, 8 ft. 6 ins.; track front, 4 ft. 3 ins.; track rear, 4 ft. 2 ins.; overall length (over bumpers), 14 ft. 5 ins. approximately; overall width, 5 ft. 13 ins.; overall height (over hood), 4 ft. 4½ ins.; (over windscreen), 4 ft. 11 ins.; ground clearance, 7½ ins.; unladen turning circle, 31 ft. 0 ins.; dry weight 24 c.wts.

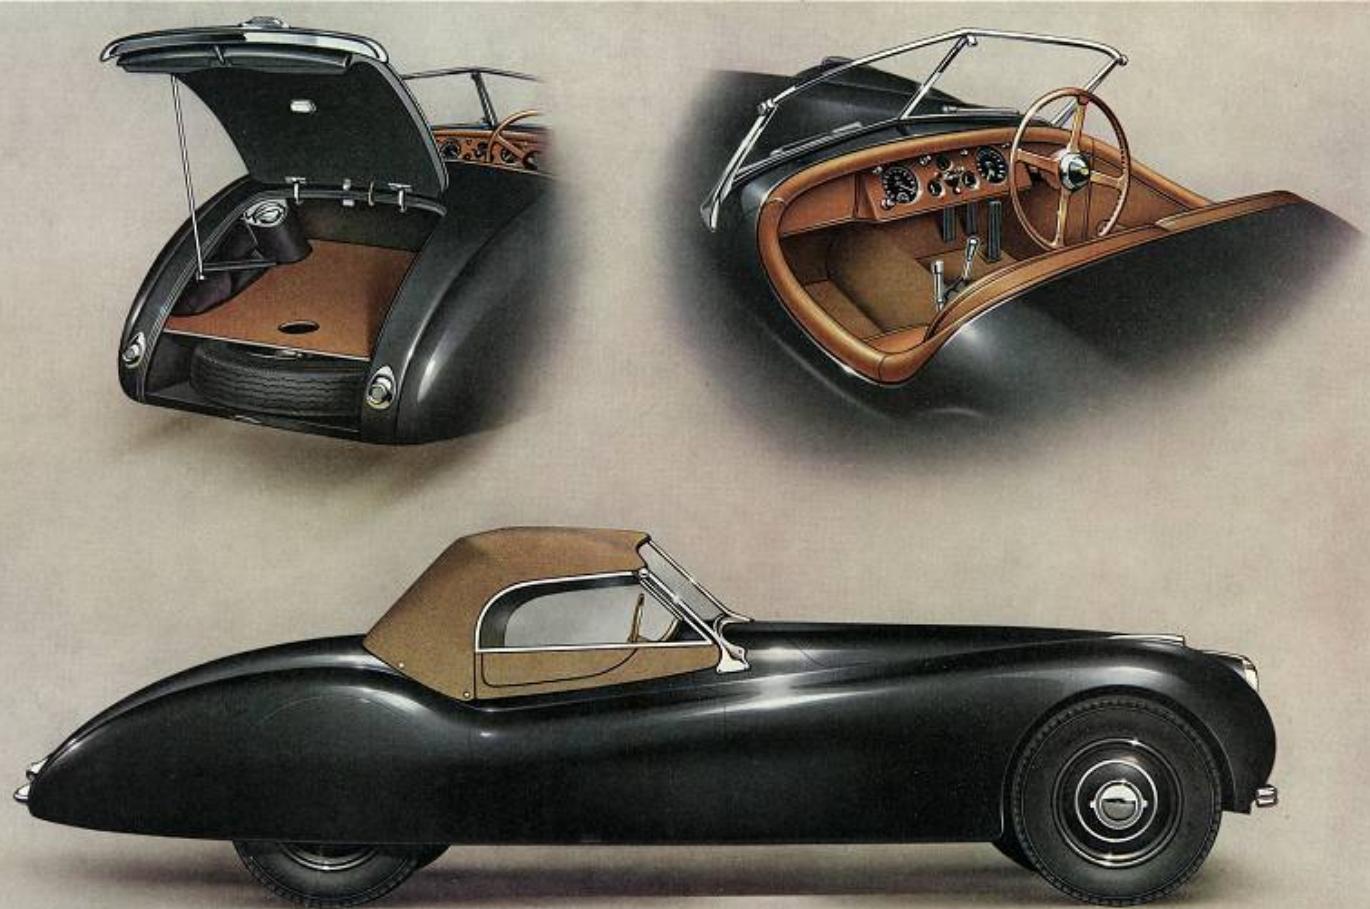

ALTERNATIVE EQUIPMENT. For sporting events an alternative 24 gallon fuel tank and two spare wheels can be supplied.

This is not generally recommended owing to the considerable reduction in luggage accommodation.

THE MARK V JAGUAR 3½ LITRE CHASSIS

A SECTION OF THE MACHINE SHOP

The modern factory of Jaguar Cars Ltd., stands on a site of 43 acres and has a floor area of over half a million square feet. Pictured above is a portion of one of the Machine Shop Bays where Jaguar engine components are made. Since the war, new plant and equipment of the latest and most advanced design have been installed, including many machines developed expressly to conform with the high precision standards which Jaguar engineering practice demands.

J FOREWORD

The years which have passed since the introduction of the first Jaguar have seen such growth in its reputation that today the name of Jaguar is held in the highest esteem throughout the entire world. In the Mark V and XK Jaguars described herein, there will be found not only all those qualities which have placed Jaguar in the forefront of high performance cars, but many new advances in design which still further enhance Jaguar's high reputation. Each of its many new features has been developed only after years of patient research and stringent tests commenced, in many cases, in the years before the war. Thus, the new independent front suspension, the new frame, the new hydraulic brakes and the new transmission system have not been hurriedly designed merely to keep abreast of a trend, but have undergone long and arduous trial under the worst possible conditions until perfection has been assured. In the newly introduced XK series twin overhead camshaft engines (fitted only to the Super-Sports 2-seater), all compromise in design has been eliminated, for incorporated in each engine is all the most advanced technical knowledge available to-day on naturally aspirated petrol engines. An indication of the efficiency of the Jaguar XK engine will be found in the fact that a 2-litre Jaguar XK engine was used by Lt.-Col. Coldie Gardner in 1948 when he broke three world speed records for unsupercharged cars of 2-litre capacity at a speed of 175.0 m.p.h. with his specially constructed lightweight car running on methanol. Except for the fitting of high compression pistons and a magneto, the engine was of entirely standard construction. Further proof of the high efficiency of the XK engine was provided on the 30th of May, 1949, when an entirely standard production 3½ Litre Model running on pump petrol attained a speed of 132.6 m.p.h. under the official observation of the Royal Automobile Club of Belgium. This speed is the highest ever recorded by a standard production car.

In appearance and finish no less than in performance Jaguar occupies a leading place amongst fine cars; for in the graceful flowing lines of every model there will be found the dignity and perfect taste which critics the world over have declared to be inherent characteristics of Jaguar design. The Mark V and XK Jaguars are, indeed, brilliant successors to a long line of distinguished forerunners.

COLOUR SCHEMES

The colour schemes listed below are standard, and any deviation involving special treatment of coachwork and/or upholstery will entail extra charges for which a quotation will be given at the time of ordering.

Owing to the fact that carpets, carpet bindings and door pipings are supplied in colours to match standard upholstery only, it is strongly recommended that patterns of these items be requested before a final decision is made on non-standard upholstery. In the absence of any instructions to the contrary, non-standard upholstery will be supplied with carpets, carpet bindings and door pipings in a stock colour nearest or most appropriate to the upholstery chosen.

GUARANTEE

On the sale or supply of all motor car and goods by Jaguar Cars Limited (called "the Company") and on the carrying out of all repairs and work by them, all guarantees, warranties or conditions (including any condition as to quality or fitness for any particular purpose) whether express, or implied by Statute, Common Law or otherwise, are excluded, and hereby expressly negatived.

In lieu of such express or implied conditions, warranties or guarantees the Company will give the following guarantee PROVIDED that the customer correctly fills up and signs the slip at the foot of this document and delivers this document with the attached slip so filled up and signed to the Company within seven days of the purchase by the customer of a Jaguar Car or goods. On receipt of this document so completed and signed the Company will return the top portion hereof to the customer.

It must be clearly understood that if a customer fails to comply with this preliminary condition the Company will be under no liability whatsoever either upon the following guarantee or upon any express or implied condition, warranty or guarantee.

MANUFACTURERS' GUARANTEE

In case of defect, breakage or breakdown of any motor car or goods supplied by the Company being discovered or occurring within SIX CALENDAR MONTHS from the date of sale, caused by defective workmanship or material (proved to the satisfaction of the Company) the defective part will be repaired or the Company will supply free of charge a new part in place thereof. Such period of six months is from the date of the supply by the Company of the motor car or goods, but if the motor car or goods are sold by a motor dealer and have not been previously used, the period starts from the date of supply by such dealer to the customer.

The Company's responsibility is limited to the conditions of this guarantee and the Company will not be liable for any damages or contingent or resulting liability or other loss arising through any breakdown, breakage or defect. The Company does not acknowledge any claims in respect of labour expenses including labour expended in dismantling or fitting arising from repairs, nor does it accept any responsibility for repairing or the fitting of replacement parts executed by Agents, or other repairers. The Company will also not be responsible for defect, breakage or breakdown caused by wear or tear, misuse or neglect. The judgment of the Company in all cases of claims shall be final and conclusive and the customer agrees to accept its decision on all questions as to defects and to the exchange of part or parts. After the expiration of six months from the despatch of notification of the Company's decision the part or parts submitted for inspection may be scrapped by the Company or returned to the customer carriage forward. The Company accepts no responsibility for any goods which have been altered after leaving the Company's works, or which have been used in motor racing or let out on hire or loan from the Company's identification numbers or marks have been altered or removed. The Company accepts no responsibility for tyres, spectometers, electrical equipment, glass (or Safety Glass) or any other parts or accessories which are not the Company's own manufacture. All claims of alleged defect in such items must be referred to the respective manufacturers direct. The Company accepts no responsibility on the sale of second-hand motor cars.

This guarantee is subject to the following conditions :—

CONDITIONS

1. This guarantee shall not be transferred to anyone unless the Company's consent in writing has first been obtained to such transfer.
2. The Company's guarantee shall not apply to any motor car or goods which have been purchased at any price other than the Company's current retail price at the time of sale.
3. Any motor car or goods alleged to be defective must be returned to the Guarantee Department of Jaguar Cars Limited, Coventry, carriage paid, and clearly labelled with the sender's name and address, within ten days of discovery of alleged defect. A letter under separate cover must at the same time be sent to the Guarantee Department giving the following details :—
 - (a) Commission Number of the car.
 - (b) The nature of the defect, breakage or breakdown which is alleged.
 - (c) A brief description of all circumstances which will facilitate a quick and satisfactory settlement.
 - (d) If there has been any correspondence or an invoice rendered the Company's reference number should be quoted.
4. Delivery of all goods supplied by the Company under this guarantee will be made at the Company's Works.
5. The term "Agent" where used is in a complimentary sense only and those persons or firms who are styled the Company's "Agents" are not authorised to advertise, incur any debts, transact any business, or incur any liabilities whatsoever on the Company's behalf, nor are they authorised to give any guarantee or warranty nor make any representations on the Company's part other than those contained in this document.

GUARANTEE AS TO REPAIRS AND OVERHAULS

The Guarantee and Conditions set forth above cover, and are applicable to, repairs executed by the Company with the exception that the period of Guarantee is for three calendar months from the date of completion of repairs.

Cars which are sent for repair will be driven by the Company's employees and/or Agents at the risk and responsibility of the owners only. Repairs of cars are undertaken only on the assumption that the owners give the Company authority to drive the vehicles on their behalf.

We reserve the right to amend the specifications contained in this catalogue from time to time as may be considered necessary for the purpose of improvement.

JAGUAR CARS LIMITED

COVENTRY ENGLAND

SPECIFICATION GENERALE

MODELE V - 3.5 LITRES

MOTEUR. Jaguar Modèle V à 6 cylindres, 3,5 litres ; 82 mm. d'alésage et 110 mm. de course ; 3,485 cm.³, développant 125 CV. au frénin à 4,250 t.p.m. ; soupapes en tête de grand diamètre commandées par poussoirs ; vilebrequin équilibré à 7 paliers de 6,35 mm. de diamètre reposant sur larges coquissins de précision à coquilles en acier ; bielle en alliage léger ; bloc-cylindre en fonte au chrome-nickel-manganèse ; rapport de compression, 6,75 : 1 ; refroidissement par pompe de circulation avec refroidisseur par air ; moteur à détonation ; petit modèle spécialement étudié pour entièrement forcée, circulation complète passant par filtre à succion ; allumage spécial "Lucas de Luxe" par bobine et distributeur ; carburateurs jumelés S.U. avec contrôle électrique du choix des.

CHASSIS. Le châssis est construit en tôle d'acier embouri à haute résistance. Les longerons sont droits et de grande section. La rigidité à la torsion est assurée par une entretoise centrale en section D de 180 mm. de hauteur et une traverse frontale en caisson très robuste.

TRANSMISSION. Boîte synchromesh à 4 vitesses de construction perfectionnée. Pignons hélicoïdaux simples renforcés, montés sur roulements à aiguilles. Rapport des vitesses : 1ere, 14,5; 2eme, 8,52 ; 3ème, 5,67 ; 4eme directe, 4,3. Arbre de transmission à cardans métalliques "Hardy Spicer" et embrayage "Borg & Beck" à disque unique de 254 mm. de diamètre travaillant à sec. Levier de vitesses à levier central. Direction à droite.

SUSPENSION. Suspension avant indépendante du système à barre de torsion et guides triangulaires. Amortisseurs hydrauliques à action directe. Suspension arrière par longs ressorts en acier silico-manganèse ; les extrémités des lampes sont en forme de fer de lance et pointues pour donner un fonctionnement simple et silencieux ; contrôlés par amortisseurs à piston. Les ressorts arrière sont entièrement protégés par gaines munies de grisseuses.

FREINS. Freins hydrauliques à deux palets primaires, avec tambours en fer très dur, 305 mm. de diamètre. Surface de friction, 1,187 cm.². Conduits de refroidissement aux tambours avant. Frein à main à poignée type pistolet agissant sur les roues AR seulement par commandes à tringles indépendantes.

DIRECTION. La direction est du type "Burman" à recirculation de billes, assurant une maniabilité facile et précise à toutes les allure. Volant de direction réglable "Bluemel," 457 mm. de diamètre. Direction à droite ou à gauche.

ROUES ET PNEUS. Roues en acier embouti à fixation par écrous, à jantes larges pour pneus "Dunlop" Supercomfort 6,70 x 16.

ALIMENTATION D'ESSENCE. Par pompe électriques du réservoir d'essence de 63,5 litres de capacité, munie d'une réserve et témoin lumineux. Bouchon de remplissage escamoté dans l'aile arrière, avec fermeture à clef.

INSTALLATION ELECTRIQUE. Installation "Lucas de Luxe" de 12 volts avec dynamo ventilée. Accumulateurs de 64 amp. de capacité pour 10 heures de décharge. Phares et feux de ville incorporés dans les ailes. Deux phares anti-brouillard ; lanterne Stop ; lanternes de marche arrière ; double feu arrière. Deux lampes intérieures et éclairage intérieur supplémentaire commandé par les portières. Klaxon jumelé à double ton. Essuie-glace à double balai. Allume-cigare.

INSTRUMENTS DE BORD. Indicateur de vitesse de 125 mm. de diamètre, étalonné jusqu'à 190 Km./h., compte-tours de 125 mm. de diamètre ; ampermètre ; manomètre d'huile ; indicateur de température d'eau ; indicateur de niveau d'essence ; montre ; indicateurs de direction à retour automatique avec témoin lumineux.

CLIMATISATION. Groupe de conditionnement d'air comprenant dispositif anti-givre et anti-buée. Dispositif perfectif d'aspersion permettant la prise d'air froid et filtré de l'extérieur de la voiture pour le refroidissement de l'intérieur par temps chaud, et l'air chaud par temps froid.

CAPITONNAGE ET TAPIS. Coussins recouverts entièrement en cuir "Vaumol" de la meilleure qualité et "Dunlopillo". Plancher plat recouvert de tapis épais posés sur assise de feutre.

SIEGES. Sièges AV, type baquet, coulissants et réglables en hauteur et profondeur. Accoudoir central escamotable fortement rembourré dans le compartiment arrière.

AGENCEMENT INTERIEUR. Ébénisteries, encadrements de fenêtres et tables à instruments en bois de première qualité, fini en noyer ronceux élégé ; poignées des portières à boutons-poussoirs ; pochettes de portière en cuir souple et de grande capacité avec fermetures-éclairs ; deux grilles métalliques pour l'use fermant à clef ; fenêtres avec volets d'aération dans les compartiments AV et AR. G. l'avant et R. l'arrière. Poignées à boutons ; cendriers.

ROUE DE SECOURS ET OUTILLAGE. La roue de secours est rangée dans un compartiment spacieux au-dessous du coffre à bagages. Les outils sont logés chacun à part dans un coffre intérieur aménagé dans le couvercle de la malle arrière, avec éclairage automatique.

COFFRE A BAGAGES. Il y a beaucoup de place dans le grand coffre arrière, dont le couvercle une fois ouvert constitue un porte-bagages supplémentaire. L'intérieur du coffre ainsi que celui du couvercle sont polis et garnis de bandes protectrices en caoutchouc.

CRIC. Chaque roue peut être soulevée avec un effort minimum au moyen d'un vérin spécial d'emploi facile.

DIMENSIONS. Empattement, 3,05 m. ; voie avant, 1,43 m. ; arrière, 1,46 m. ; longueur totale, 4,75 m. ; largeur totale, 1,77 m. ; hauteur totale, 1,60 m. ; rayon de virage (à vide) 10,67 m. ; poids net approximatif, 1,676 kg.

ALLGEMEINE ANGABEN

MARK V - 3,5 LITER

MOTOR. Sechszylinder Jaguar Mark V, 3,5 Liter, 82 mm. Bohrung, 110 mm. Hub, 3,485 cm.³, Bremsleistung 125 PS bei 4,250 U/min. Reibach. drosselbar mit dem Karten-Stangen betätigten, obengesteuerten Ventiln. Durch Gewichtswichte ausgewichene Kurbelwelle mit 63,5 mm. Drehmesser, siebenfach gelagert, Präzisionslager mit Stahlseiten, Leichtmetall-Pleuelstangen. Chromestahl-Zylinderbohrer, abnehmbarer Zylinderkopf, Verdichtungsverhältnis 6,75. Kühlung durch Umlaufmotor mit Wasserpumpe. Im Oel tank befindet sich ein Ölfilter, sämtliche Antriebswellen-Durchflusshöhen geschlossen. Das Oel zirkuliert durch einen Olfilter. Spezial "Lucas de Luxe" Zündspule und Zündverteiler, System, Doppelvergaser mit automatischer, elektrisch betätigter Anlassdrossel.

RAHMEN. Gradliniger Stahlkastenrahmen von außerordentlicher Festigkeit und Steifheit. Durch Quersteifungen mit U-Profil von 180 mm. Höhe und vorderen Kastenkragern wird Torsionsfestigkeit gewährleistet.

KRAFTÜBERTRAGUNG. Dreiecks-Torsionsfeste-Symmetrie-Konstruktion. Schaltgetriebe mit verdecktem Zahnräder in Nadelgelenkenlauf. Übersetzungsverhältnis : 1 Gang, 14,5 : 2 Gang, 5,67 : 3 Gang, 5,67 : 4 Gang, 4,3. Getriebe, Gangschaltung, Kardanwelle "Hardy Spicer". Einscheiben-Trockenkupplung "Borg & Beck", 254 mm. Durchmesser. Schaltung durch den Mitte angebrachten Schalthebel.

ABFEDERUNG. Unabhängige Vorderahnhängung nach dem Dreiecks-Torsionsfestsprinzip. Direkt wirkende hydraulische Stoßdämpfer. Hintere Abfedern durch lange Blattfedern mit Stahl-Matezahl-Verbindungen mit hydraulischen Stoßdämpfern. Die Blattfedern sind spitz zulaufend um eine weiche und gefälschlose Wirkung zu verschaffen. Hintere Abfedern in mit Oeler versehenen Gummiaschen vollständig eingewickelt.

BREMSEN. Hydraulische Bremsen. Zwei geschoßene Bremssätteln wirken auf Trommeln mit 305 mm. Durchmesser. Bremsbelägebleiche 1187 cm.². Vorderstromdurchgang mit Kettensicherung. Die Handbremse mit Pistolengriff wirkt durch besonderes Gestänge nur auf die Hinterbremsen.

RAEDER UND REIFEN. Kräfte Press-Stahl-Scheibenräder mit Bolzenbefestigung. Bremsbeläge passend für "Dunlop Supercomfort" Reifen 6,70 x 16.

BRENNSTOFFVERSORGUNG. Elektrisch arbeitende Pumpe fördert den Brennstoff aus dem 63,5 ltr. Reservoir Behälter mit Füllstandsanzeiger und Kontrolllampe. Die Bonnetöffnung ist in hinterer Konsole verborgen unter einer Platte.

ELEKTRISCHE AUSRÜSTUNG. Durchweg "Lucas de Luxe" Ausführung. (2 Volt Anlage, Lichtmaschine mit Luftkühlung durch Ventilator, Batterie, Kapazität 64 Amp. bei 10 stündiger Entladung. Eingegebauter Scheinwerfer, Seitenlampen in den Kotflügel. Zwei Nebellampen, Stoplicht, Lampe zum Rückwärtsgehen, doppelter Rückleuchte. Zwei Innenleuchten mit besonderen durch die Türen betätigten Innenbeleuchtung. Zwei abgestimmte Signalthörner. Unabhängig arbeitender Doppelgeschwindigkeits-Zigarettenanzünder).

INSTRUMENTE. Bis 190 Km./h. anzugehender Geschwindigkeitsmesser von 125 mm. Durchmesser, Tourenzähler von 125 mm. Durchmesser, Ampermeter, Odomrometer, Wassertemperaturanzeiger, Benzinhahn, Uhr, sehsabschaltender Winkermitt Kontrolllampe.

LÜFTUNG. Eingegebauter Lüftungsanlage, die gleichzeitige Schutz bietet gegen Vereisung und Beschlag. Ein verbessertes System für Zufuhr gefilterter Frischluft sorgt für Kühlung bei heißem Wetter und Wärme bei kaltem Wetter.

POLSTERUNG UND TEPPICHBLECH. Polsterbezüge durchwegs aus ersklaßigen "Vaumol" Leder und "Dunlopillo". Der ebenen Fußboden ist mit einem dicken, kürzlerzeugten Teppich bedeckt.

SITZE. Vom Klubsesselsitzer, die sowohl vor und zurück als auch in der Höhe verstellbar sind. Gut gepolsterte, wegliegende Metallstahllehnen. Hintersitz.

INNENAUTOMATISCHE VERLÄUFEN. Feuerlöscher in einem Abzugsschrank beobachtet Qualitätsholz in polier Nussbaumausführung. Druckknopf-Türbeschläge. Große Taschen aus weichem Leder mit Reissverschluss an den Türen. Geräumige Fächer, circa davon abschließbar. Sowohl vorn als auch hinten an den Türen. Pumpe für das Waschfenster vorgesehen (heute Coups nur vorne). Handschuh-Schublade. Aschenbecher.

RESERVERAD UND WERKZEUG. Das Reserverad befindet sich in einer besonderen Abteilung des Gepäckraums. Die Werkzeuge sind getrennt in einem besonderen Schuhkarton und mit automatischer Beleuchtung verschenen Behälter im hinteren Gepäckraumdeckel untergebracht.

GEPAEKUNTERBRINGUNG. Der hintere Gepäckraum ist reichlich bemessen, und der Deckel lässt sich herunterklappen und als zusätzlicher Gepäckhalter benutzen. Sowohl der Raum selbst als auch der Deckel sind innen poliert und mit erhöhten Gummischutzstreifen verkleidet.

LEICHES HEHEN. Jedes Rad lässt sich mittels einer Spezialhebevorrichtung mühelos vom Boden abheben.

HAUPTABMESSUNGEN. Radstand, 3,05 m. Spurweite vorn, 1,43 m. Hinten, 1,46 m. Grösste Länge, 4,75 m. Grösste Breite, 1,77 m. Grösste Höhe, 1,60 m. Kleinster Wendekreis, unbeladen, 10,67 m. Leergewicht, etwa 1,676 kg.

ESPECIFICACION GENERAL

MARK V - 3,5 LITROS

MOTOR. Motor Jaguar Mark V de seis cilindros, 82 mm. de diámetro por 110 mm. de recorrido ; 3,485 cm.³, desarrollo 125 CV. a 4,250 U/min. Reibach. drosselbar con Karten-Stangen. Stangen betätigten obengesteuerte Ventiln. Durch Gewichtswichte ausgewichene Kurbelwelle mit 63,5 mm. Drehmesser, siebenfach gelagert, Präzisionslager mit Stahlseiten, Leichtmetall-Pleuelstangen. Chromestahl-Zylinderbohrer, abnehmbarer Zylinderkopf, Verdichtungsverhältnis 6,75. Kühlung durch Umlaufmotor mit Wasserpumpe. Im Oel tank befindet sich un Ölfilter. sämtliche Antriebswellen-Durchflusshöhen geschlossen. Das Oel zirkuliert durch einen Ölfilter. Spezial "Lucas de Luxe" Zündspule und Zündverteiler, System, Doppelvergaser mit automatischer, elektrisch betätigter Anlassdrossel.

BASTIDOR. Armazón de acero plano de perfil cuadrangular de gran resistencia y rigidez. Unos tirantes cruzados escamoteados de 180 mm. de profundidad y un travieso frontal cuadrangular, asegura la rigidez torsional.

TRANSMISION. Caja de cuatro velocidades, de tasa sincrónica de diseño especial, engranajes horizontales, discos simples de rodillos de acero sobre rodillos de acero. Relaciones de engrane : primera, 14,5 ; segunda, 5,67 ; tercera, 5,67 ; cuarta, 4,3. Cambio manualmente mediante mecanismo "Hardy Spicer" ; embrague "Borg & Beck" de 254 mm. de diámetro de placa seca y simple. Palanca ubicada en el centro accionando los cambios por control remoto.

SUSPENSION. Suspensión delantera independiente mediante barra de torsión y horquillas ; amortiguadores hidráulicos a acción directa. Suspensión trasera. Elásticos de hojas largas de acero sin muelles ni amortiguadores, tipo de embolo. Hojas puntadas para asegurar un funcionamiento flexible y silencioso. Elásticos traseros completamente envueltos en vainas de resorte provistas de engrosadores.

FRENOS. Totalmente hidráulicos de dos zapatas y tambores de gran resistencia de 305 mm. de diámetro, con dispositivos de enfriamiento a los tambores delanteros ; superficie de fricción, 1,187 centímetros cuadrados. Freno de mano accionado por palanca de tipo de pistola que acciona sobre las ruedas traseras solamente y por articulación separada.

DIRECCION. Volante tipo "Burman" de recirculación de bola, liviana y segura a todas velocidades. Volante de dirección accionado "manual" 457 mm. Dirección a izquierda o a derecha.

RUEDAS Y NEUMATICOS. Ruedas de discos de acero prensado de profunda concavidad fijadas con media de balones ; llantas de base con anclaje con neumáticos "Dunlop Super-Comfort" 6,70 x 16.

SISTEMA DE ALIMENTACION DE COMBUSTIBLE. Por medio de bomba eléctrica, desde tanque trasero de 63,5 litros de capacidad con provisión de reserva, luz de advertencia, y dotado de cerradura.

EQUIPO ELECTRICO. Trabajando "Lucas de Luxe" de 12 volts, dinamo con dispositivo de variación de velocidad y amperímetro de capacidad 10 horas de descarga a 1 faro. Faros de alta y baja intensidad. Faro de mano accionado por palanca de tipo de pistola que acciona sobre las ruedas traseras solamente y por articulación separada.

INSTRUMENTOS. Un velocímetro de 125 mm. de diámetro para 190 Kms. por hora ; un cuentakilómetros de 125 mm. de diámetro ; un amperímetro ; un manómetro de presión aceite ; un indicador de temperatura del agua ; un indicador de nafta ; una redel ; luces indicadoras de señales de tráfico, con luz de advertencia.

ACONDICIONADOR DE AIRE. El equipo de acondicionador de aire incluye un dispositivo para desolventar y deshumidificar el parabrisas. Un sistema perfeccionado de inducción permite la admisión de aire puro y fresco filtrado, desde el exterior para refrigerar el coche durante el tiempo de calor, y la entrada de aire caliente durante el tiempo frío.

TAPETAS Y ALFOMBRA. En el interior se aplica la mejor calidad de cuero, "Vaumol" y Dunlopillo, que absorben el sudor y protegen la piel contra la humedad y el calor.

ASENTOS. Los asientos delanteros son ajustables en cuanto a altura y posición. El compartimiento trasero lleva un apoyo brazo central plegable, el cual está debidamente relleno.

GUARNICIONES INTERIORES. Guarniciones interiores adornadas ; marcos de ventana y tablero de instrumentos de la mejor calidad de madera finamente ilustrados al nogal ; manijas de puertas accionadas mediante botón de empuje ; bolsillos de las puertas de gran tamaño con cierre automáticos "zip" ; Cajoncitos del tablero amplios, siendo uno de ellos dotado de cerradura ; cajoncito para guantes ; cajoncito para pañuelos.

RUEDA AUXILIAR Y NEUMATICO. La rueda auxiliar va colocada en un espacio especial debajo del baúl. Las herramientas van separadas entre si en una caja especial que reduce los ruidos, la que se halla embutida en la tapa del baúl ; estando dotada de una luz automática.

COMPARTIMENTO DE EQUIPAJES. El baúl es de amplio espacio, pudiendo aumentar su capacidad bajando la tapa del mismo. El interior está finamente pulido, estando las partes en que apoya el equipaje protegidas con tiras de goma.

SISTEMA DE CRIQUE. Cierre de fácil elevación y manejo sencillo, que se aplica en puntas de los asientos y en el tablero.

DIMENSIONES PRINCIPALES. Distancia entre ejes, 3,05 mm. ; rueda trasera, 1,460 mm. ; largo total, 4,75 mm. ; anchura total, 1,77 mm. ; alto total, 1,60 mm. ; peso del coche vacío, 1,676 kilos aproximadamente.

SPECIFICATION GENERALE

MODELE V - 2,5 LITRES

MOTEUR. Jaguar Modèle V à 6 cylindres, 2,5 litres ; 73 mm. d'alésage et 106 mm. de course ; 2,663 cm.³, développant 102 CV. au frein à 4,600 r.p.m.; soupapes en tête de grand diamètre, commandées par pousoirs; vilebrequin équilibré à 7 paliers de 5,5 mm. de diamètre reposant sur larges coquilles de précision à coquilles en acier; bielles en alliage léger; bloc-cylindre en fonte aux échancrures démontables ; roulement de rotation, 7,3 ; refroidissement par pompe de circulation avec régulateur thermique et dérivation à trois voies ; huile entraînant la pompe d'écoulement forcée, circulation complète passant par filtre à succion ; allumage spécial "Lucas de Luxe" par bobine et distributeur; carbureurs jumelés S.U. avec contrôle électrique du choke.

CHASSIS. Le châssis est construit en tôle d'acier embouti à haute résistance. Les longerons sont droits et de grande section. La rigidité à la torsion est assurée par une entretoise centrale en section d'U de 180 mm. de hauteur et une traverse frontale en caisson très robuste.

TRANSMISSION. Boîte synchromesh à 4 vitesses de construction perfectionnée. Pignons hélicoïdaux simples renforcés, montés sur roulements à aiguilles. Rapport des vitesses : première, 15,35; deuxième, 9,01; troisième, 6,21; quatrième directe, 4,85. Arbre de transmission à cardans métalliques "Hardy Spicer" embrayage "Borg & Beck" à disque unique de 229 mm. de diamètre travaillant à sec. Levier de vitesses et embrayage placés dans le châssis.

SUSPENSION. Suspension avant indépendante du système à barre de torsion et poulies triangulaires. Amortisseurs hydrauliques à action directe. Suspension arrière par longs ressorts en acier silico-manganèse ; les extrémités des lames sont en forme de fer de lance et pointées pour donner un fonctionnement souple et silencieux ; contrôlés par amortisseurs à piston. Les ressorts arrière sont entièrement protégés par gaine munies de graisseuses.

FREINS. Freins hydrauliques à deux patins primaires, avec tambours en fer très dur, 305 mm. de diamètre. Surface de friction, 1,187 cm.². Conduits de refroidissement aux tambours avant. Frein à main à poignée type pistolet agissante sur les roues AR seulement par commandes à tringles indépendantes.

DIRECTION. La direction est du type "Burman" à recirculation de billes, assurant une manœuvre positive et précise à toutes les allures. Volant de direction réglable "Bluemel", 457 mm. de diamètre. Direction à droite ou à gauche.

ROUES ET PNEUS. Roues en acier embouti à fixation par écrous, à jantes larges pour pneus "Dunlop" Super-confort de 6,70 x 16.

ALIMENTATION D'ESSENCE. Par pompe électrique du réservoir d'essence de 6,5 litres de capacité, munie d'une réserve et témoin lumineux. Bouchon de remplissage escamoté dans l'aile arrière, avec fermeture à clé.

INSTALLATION ELECTRIQUE. Installation "Lucas de Luxe" de 12 volts avec dynamo ventilée. Accumulateurs de 64 amp. de capacité pour 10 heures de décharge. Phares et feux de ville incorporés dans les ailes. Deux phares anti-brouillard ; lanterne Stop ; lanterne de marche arrière ; double feu arrière. Deux lampes intérieures et éclairage intérieur supplémentaire commandé par les portières. Klaxon jumelé à double ton. Essuie-glace à double bâti. Allume-cigare.

INSTRUMENTS DE BORD. Indicateur de vitesse de 125 mm. de diamètre, échappement jusqu'à 190 Km./h. ; compte-tours de 125 mm. de diamètre ; ampermètre ; manomètre d'huile ; indicateur de température d'eau ; indicateur de niveau d'essence ; montre ; indicateurs de direction à retour automatique avec témoin lumineux.

CLIMATISATION. Groupe de conditionnement d'air comprenant dispositif anti-givre et anti-buée. Dispositif perfectionné d'aspiration permettant la prise d'air frais et filtré de l'extérieur de la voiture pour le refroidissement de l'intérieur par temps chaud, et l'air chaud pour temps froid.

CAPITONNAGE ET TAPIS. Coussins recouverts entièrement en cuir "Vaumol" de la meilleure qualité et "Dunlopillo". Plancher plat recouvert de tapis épais posés sur assise de feutre.

SIEGES. Sièges AV, type baquet, coulissons et réglables en hauteur et profondeur. Accoudoir central escamotable fermant rembourré dans le compartiment arrière.

AGENCEMENT INTERIEUR. Ebénisteries, encadrements de fenêtres et tableaux à instruments en bois de haute qualité, fini en peinture ronceux ciré ; poignées des portières à boutons-poussoirs et serrures de serrure en cuir moyen et une grande capacité avec fermtures-éclairs ; deux grandes niches, dont l'une fixée à ciel-réglable avec volets d'aération dans les compartiments AV et AR (à l'avant seulement pour les Cabriolets). Tiroir à gants ; cendriers.

ROUE DE SECOURS ET OUTILLAGE. La roue de secours est rangée dans un compartiment spécial au-dessous du coffre à bagages. Les outils sont logés chacun à part dans un caisson insonorisé aménagé dans le couvercle de la malle arrière, avec éclairage automatique.

COFFRE A BAGAGES. Il y a beaucoup de place dans le grand coffre arrière dont le couvercle une fois ouvert constitue un porte-bagages supplémentaire. L'intérieur de ce coffre ainsi que celui du couvercle sont polis et garnis de bandes protectrices en caoutchouc.

CRIC. Chaque roue peut être soulevée avec un effort minimum au moyen d'un vérin spécial d'emploi facile.

DIMENSIONS. Empattement, 3,05 m. ; voie avant, 1,43 m. ; arrière, 1,46 m. ; longueur totale, 4,75 m. ; largeur totale, 1,77 m. ; hauteur totale, 1,60 m. ; rayon de virage (à vide) 10,67 m. ; poids net approximatif, 1,676 kg.

ALLGEMEINE ANGABEN

MARK V - 2,5 LITER

MOTOR. Sechszylinder-Jaguar-Mark-V, 2,5 Liter, 73 mm. Bohrung, 106 mm. Hub, 2,663 cm.³. Bremsleistung 102 bei 4,600 Touren. Reichlich dimensionierte durch Stoßstangen betätigte, obengesteuerte Ventile. Durch Gegengewichte ausgleichende Kurzhubwelle mit 63,6 mm. Durchmesser, siebenfach gelagert, Präzisionslager mit Stahlhülsen. Leichtmetall-Pleuelstangen. Christen-Zylinderblock, abnehmbarer Zylinderkopf. Ventildeckelverkleidung, 7,3. Kühler mit dem Umlaufprinzip mit Thermoschalter. Öl arbeitende Schalternpumpe, sämtliche Systeme sind durch Druckluftantrieb angetrieben. Das Öl zirkuliert durch einen Ochlitier. Spezial "Lucas de Luxe" Zündspule und Zündverteilerystem. S.U. Doppelvergaser mit automatischer, elektrisch betätigter Anlasserspule. RAHMEN. Gräßlicher Stahlkastenrahmen von außerordentlicher Festigkeit und Steifheit. Durch Querversteifungen mit U-Profil von 180 mm. Höhe und vorderer Kastenquerträger wird Torsionsfestigkeit gewährleistet.

KÜHLER UND LUFTEINLADUNG. Der Kühler ist eine neuartige Konstruktion. Schrägvorrichtung mit verdeckten Zifferblättern in Nadelgitter-Lamellen. Überdruckventil, Ventilatormotor, 1 Gang, 15,35; 2 Gang, 9,01; 3 Gang, 6,21; 4 Gang, 4,85. Getriebe, Gummiring-Kardanwelle "Hardy Spicer". Einscheiben-Trockenkupplung "Borg & Beck", 229 mm. Durchmesser. Schaltung durch ein im Mitte angebrachtes Schalthebel.

ABFEDERUNG. Unabhängige Vorderlaufhängung nach dem Dreiecks-Torsionsstabprinzip. Direkt wirkende hydraulische Stoßdämpfer. Hintere Abfedern durch lange Blattfedern mit Spannungsverlust-Verstärkung und Federbegrenzer. Stoßdämpfer. Die Blätterenden sind zufallend um eine weiche und geräuschlose Wirkung versiehen. Hintere Abfederung in mit Oeler versehenen Gummischalen vollständig eingeklebt.

BREMSEN. Hydraulische Bremsen. Zwei geschobene Bremsbacken wirken auf Trommelräder von 305 mm. Durchmesser. Bremsbelagfläche 1187 cm.². Vorderstromrollen mit Kühlrippen versiegeln. Die Handbremse mit Pistolengriff wirkt durch besonderes Gestänge auf die hinteren Trommeln.

LENKUNG. Kugelkopflenkung "Burman", die bei allen Geschwindigkeiten leicht zu bedienen ist und absolut einwandfrei arbeitet. Verstellbare "Bluemel"-Lenkrad, Lenkbremse, Lenkgriff, Lenkradkugelkopf, Lenkung mit Rückwärtsgang, Lenkradkugelkopf.

RAEDER UND REIFEN. Kräftige Press-Stahl-Scheibenräder mit Bolzenbefestigung. Durchgehendes Spurmaß 1470 mm. Reifen "Bluemel" 6,70 x 16.

BIENNOSTOFFVERSORGUNG. Elektrisch angetriebene Pumpen fördern den Benzinstoff aus dem hinteren Kraftfessel verdeckt untergebracht.

ELEKTRISCHE AUSTRETUNG. Durchweg "Lucas de Luxe" Ausführung. 12 Volt Anlage. Lichtmaschine mit Luftkühlung durch Ventilator, Batterie, Kapazität 64 Amp., bei 10 stündiger Entladung. Eingebaute Scheinwerfer, Seitenlampen in den Kotflügeln. Zusätzliche Lampe für Heckleuchte. Lampen am Rücken der Rücksitzbank und am Kofferraum. LÜFTUNG. Eingebaute Lüftungsanlage, die gleichzeitig Schutz bietet gegen Vereisung und Beschlag. Ein verbessertes System für Zufahrt geöffneter Frischluft sorgt für Kühlung bei heissem Wetter und Wärme bei kaltem Wetter.

POLSTERUNG UND TEPPICHBELAG. Polsterbezüge durchwegs aus erstklassigen, abwaschbaren Teppichdecken.

INSTRUMENTE. Bis 190 Km./h. anzeigender Geschwindigkeitsmesser von 125 mm. Durchmesser. Tachometer von 125 mm. Durchmesser, mit Ampermeter, Odolometer, Wassermtemperaturanzeige, Rundumwinkel, Uhr, Schaltwähler, Kontrolllampe.

LÜFTUNG. Eingebaute Lüftungsanlage, die gleichzeitig Schutz bietet gegen Vereisung und Beschlag. Ein verbessertes System für Zufahrt geöffneter Frischluft sorgt für Kühlung bei heissem Wetter und Wärme bei kaltem Wetter.

POLSTERUNG UND TEPPICHBELAG. Der ebene Fußboden ist mit einem klassischen, abwaschbaren Teppich bedekt.

SITZEN. Vier Kissen sind sowohl vor und zurück als auch in der Höhe verstellbar. Sie sind geschobene, wegspringende Mittelsitklemmen an Hinter- und Vorderseite.

INNENAUSTATTUNG. Zielenster, Fensterrahmen und Armaturenbretter bestehen aus Qualitätsholzern in poliert Niessbaumausführung. Druckknopf-Türbetätigung. Große Taschen an weichem Leder mit Reißverschluss an den Türen. Geräumige Fächer, eines davon abschließbar. Sowohl vorne als auch hinten sind Lüftungsöffnungen vorgesehen (beim Coupe nur vorne). Handschuh-Schublade. Aschenbecher.

RESERVARUD UND WERKZEUG. Das Reservarud befindet sich in einer besonderen Abteilung im hinteren Gepäckraum. Die Werkzeuge sind getrennt in einem besonderen, schalldichten und mit automatischer Beleuchtung versehenen Behälter im hinteren Gepäckraumdeckel untergebracht.

GEPÄCKKUNTERBRINGUNG. Der hintere Gepäckraum ist reichlich bemessen, und der Deckel lässt sich herunterklappen und als zusätzlicher Gepäckkoffer benutzen. Sowohl der Raum selbst als auch der Deckel sind poliert und mit erhöhten Gummischutzringen abgedichtet.

LEICHTES HEBEN. Jedes Rad lässt sich mittels einer Spezialhebevorrichtung mühelos vom Boden abheben.

HAUTABMESSUNGEN. Radstand, 3,05 m. Spurweite vorne, 1,43 m. Hinten, 1,46 m. Grösste Länge, 4,75 m. Grösste Breite, 1,77 m. Grösste Höhe, 1,60 m. Kleinstes Wendekreis, unbeladen, 10,67 m. Leergewicht, etwa 1,676 kg.

ESPECIFICACION GENERAL

MARK V - 2,5 LITROS

MOTOR. Motor Jaguar Mark V de seis cilindros, 73mm. de diámetro por 106 mm. de recorrido; 2,663 centímetros cúbicos de cilindrada, desarrollando 102 caballos de fuerza al freno a 4,600 revoluciones por minuto; con válvulas de admisión de diámetro grande y válvulas de escape de diámetro pequeño; sistema de engranajes de engranaje especial; motor de arranque acelerado por varillas de empuje; cigüeñal contrabalancado de 63,5 mm. de diámetro montado sobre siete cojinetes de acero revestidos de metal anti-fricción; bielas de aleación liviana; bloques de cilindros de hierro fundido al cromo; cabeza de cilindros desmontable; relación de engranaje: primera, 15,35; 2da, 9,01; 3da, 6,21; 4ta, 4,85. Ejecución totalmente metálica dividida "Hardy Spicer"; embrague "Borg & Beck" de 229 mm. de diámetro de placa plana; sistema de suministro de lubricación por bomba de circulación controlada por termostato; bomba de aceite sumergible; lubrificación por gravedad a través de un filtro de aceite; sistema especial de encendido "Lucas de Luxe" formado por bobina y distribuidor; carburadores dobles "S.U." con cebador automático controlado eléctricamente.

BASTIDOR. Armazón de acero de perfil cuadrangular de gran resistencia y rigidez. Unos tirantes cruzados acanalados de 180 mm. de profundidad y un travieso frontal cuadrangular, aseguran la rigidez torsional.

TRANSMISION. Cambio de cuatro velocidades, de rotación sincronizada de diseño especial, engranajes de engranaje: primera, 15,35; segunda, 9,01; tercera, 6,21; directa, 4,85. Ejecución totalmente metálica dividida "Hardy Spicer"; embrague "Borg & Beck" de 229 mm. de diámetro de placa plana; palanca ubicada en el centro accionando los cambios por control remoto.

SUSPENSION. Suspensión delantera independiente por medio de barras de torsión y horquillas; amortiguadores hidráulicos a acción directa. Suspensión trasera. Elásticos de hoja larga de acero silico-manganésico controlados por amortiguadores, tipo de émbolo. Hojas puntuadas para accionamiento de horquillas provistas de engranajes.

FRENOS. Totalmente hidráulicos de dos zapatas y tambor de gran resistencia de 305 mm. de diámetro, con dispositivos de enfriamiento a los tambor delanteros; superficie de fricción, 1,187 centímetros cuadrados. Freno de mano accionado por palanca de tipo de pistola que acciona sobre las ruedas traseras solamente y por articulación separada.

DIRECCION. Volante "Burman" de recirculación de bola, positiva y segura a todas velocidades. Volante de dirección ajustable "Bluemel", 457 mm. de diámetro.

RUEDAS Y NEUMATICOS. Ruedas de disco de acero prensado de profilo concavidad hacia dentro y con botones; llantas de base ancha equipadas con neumáticos "Dunlop Super-Confort", 6,70 x 16.

SISTEMA DE ALIMENTACION DE COMBUSTIBLE. Por medio de bomba eléctrica, dando un tanque traseño de 6,5 litros de capacidad con provisión de reserva, luz de advertencia, y dotado de cerradura.

EQUIPO ELECTRICO. Totalmente "Lucas de Luxe" de 12 voltios, dinamo con dispositivo de ventilación; bomba de agua de 64 amperios de corriente continua, 10 ohmios de resistencia; los principales delanteros y laterales, los traseros y los guardabarros; dos faros de noche; 1 de "60W"; 1 de "100W"; luces de cruce; luces gemelas traseras; dos luces interiores de carrocería con control adicional en las puertas; dos boinas gemelas de sonido armónico; dos limpia parabrisas de funcionamiento independiente; encendedor de cigarrillos.

INSTRUMENTOS. Un velocímetro de 125 mm. de diámetro para 190 Kms. por hora; un cuadro de instrumentos de 125 mm. de diámetro; un amperímetro; un manómetro de presión aceite; un indicador de temperatura del agua; un indicador de náutica; un reloj; luces indicadoras de señal de tráfico, con luz de advertencia.

ACONDICIONADOR DE AIRE. El equipo de acondicionador de aire incluye un dispositivo para descongelar y desempañar el parabrisas. Un sistema perfeccionado de inducción permite la admisión de aire puro y fresco filtrado, desde el exterior para refrescar la atmósfera del coche durante el tiempo de calor, y la entrada de aire caliente durante el tiempo frío.

TAPIZADO Y ALFOBRAS. En el tapizado se emplea la mejor calidad de cuero "Vaumol" y de color beige. Alfobras de goma de alta calidad y de fielro.

ASIENTOS. Los asientos delanteros son ajustables en cuanto a altura y posición. El respaldo se inclina para descansar y desempañar el parabrisas.

GUARNICIONES INTERIORES. Guarniciones interiores adornadas; marcos de ventana y tablero de instrumentos de la mejor calidad de madera finamente liñados al nogal; manijas de puertas accionadas mediante botón de empuje; bolísoles de las puertas de gran tamaño con cierres automáticos "zip"; Cajoncitos del tablero amplios, siendo uno de ellos dotado de cerradura; aletas de ventilación en los compartimientos delantero y trasero (en el coupé en el delantero solo en la parte trasera); cajoncitos para objetos de valor.

RUEDA AUXILIAR Y NEUMATICO. La rueda auxiliar va colocada en un espacio especial debajo del baúl. Las llantas van separadas entre sí en una caja especial contra los ruidos, la que se halla embutida en la tapa del baúl; cuando dotada de una llave automática.

COMPARTIMENTO DE EQUIPAJES. El baúl es de amplio espacio, pudiendo aumentar su capacidad bajando la tapa del mismo. El interior está finamente pulido, estando las partes en cuero o en tela y con protección con tiras de goma.

SISTEMA DE ALIMENTACION. Cierre de fondo del elevación y manecilla sencilla, que se aplica en puntas especiales soldadas en cada extremo del chasis.

DIMENSIONES PRINCIPALES. Distancia entre ejes, 3,05 mm.; trocha delantera, 1,43 mm.; trocha trasera, 1,46 mm.; largo total, 4,75 mm.; ancho total, 1,77 mm.; alto total, 1,60 mm.; radio de viraje, 10,67 mm.; peso del coche vacío, 1,676 kilos aproximadamente.

SUPER SPORT TYPE XK 100

2 LITRES

Spécification Générale

MOTEUR. Moteur Jaguar, type XK, 2 litres, quatre cylindres ; deux arbres à cames sous un angle de 70°, en tête, commandés par chaîne à double étage : 83 mm. d'alesage et 91 mm. de course ; cylindrée 1.970 cm³, développant 105 CV. au régime à 5,000 t.p.m.; grands silent-blocs réglables, à compression directe ; soupape d'échappement en tête ; soupape de compression, 8 à 1 ; bielle cylindrique en fonte de haute qualité ; circulation d'eau commandée par pompe ; température maintenue constante par thermostat ; culasse en alliage d'aluminium à haute résistance avec chambres de combustion hémisphériques ; pistons en alliage d'aluminium ; bielles en acier ; lubrification par pompe submersée à grand débit et filtre à succion, entièrement flottant ; deux carburateurs S.U. horizontaux avec contrôle électrique du choke ; vilebrequin équilibré de 70 mm. de diamètre, sur 3 paliers larges en acier.

CHASSIS. Le châssis est construit en tôle d'acier estampé à haute résistance, dont les longerons sont droites et de grande section. La rigidité à la torsion est assurée par deux traverses en caisson très robuste.

TRANSMISSION. Boîte à quatre vitesses avec pignons halocidaux simples, montés sur roulements à bille ; deuxième, troisième et quatrième synchronisées. Rapport des vitesses : 1,65 ; 1,59 ; 2,06 ; 5,1 ; 3,66 ; 5,59 ; 1,93 ; 4,3. (Rapports alternatifs du pont arrière : 4,5 ; 4,0 ; 3,64). Arbre de transmission "Hardy Spicer" sur roulements à bille. Embrayage "Borg & Beck" à disque unique, à sec, de 254 mm. de diamètre. Levier de changement de vitesse central.

FREINS. "Lockheed" hydrauliques, à deux patins primaires, tambours de 305 mm. de diamètre, avec conduits de refroidissement aux tambours avant. Frein à main central agit seulement sur les roues arrière par tringles indépendantes. Surface des garniture 1,3 2 cm².

SUSPENSION. Indépendante à l'avant par guides triangulaires et barres de torsion, avec amortisseurs télescopiques hydrauliques. Ressorts semi-elliptiques en acier silico-manganèse à l'arrière avec amortisseurs hydrauliques "Girling".

DIRECTION. Type "Burman" à recirculation à billes, directe et précise à toutes les allures ; volant de 450 mm. de diamètre. Direction à droite ou à gauche.

ROUES ET PNEUS. Roues-disques en acier estampé, fixées par écrous, à jantes extra-larges pour pneus "Dunlop" de 6,00 x 16.

ALIMENTATION D'ESSENCE. Par pompe électrique à grand débit, type S.U., du réservoir d'essence de 63,5 litres de capacité, muni d'une réserve et temple lumineux ; bouchon de remplissage escamoté à l'ailière arrière, avec fermeture à clé.

INSTALLATION ELECTRIQUE. "Lucas de Luxe" 12 volts, batteries de 64 amp. pour 10 heures de décharge. Contrôle constant de voltage et dynamo ventilée. Phares et lanternes d'ailes en chrome (en option) ; latrines de marche arrière ; double feu arrière ; lampe de tableau ; klaxon jumelé à double ton, aussi facile à double balle. Allumage-cigare ; moteur de démarrage ; avance à l'allumage automatique par contacteur à vide et à centrifuge.

INSTRUMENTS DE BORD. Indicateur de vitesse de 125 mm. de diamètre, élonné jusqu'à 190 Km./h., compte-tours de 125 mm. de diamètre ; ampermètre ; manomètre d'huile ; indicateur de température d'eau ; indicateur de niveau d'essence avec temple lumineux ; montre électrique.

CHAUFFERETTE. Une chauffette pour l'intérieur de la voiture peut se livrer avec un supplément de prix.

CARROSSERIE. Roulister à deux places, aérodynamique ; recouvert entièrement en cuir de haute qualité. Plancher escamotable avec tapis épais posé sur le plateau de feutre. Pour les conceurs il y a un pare-brise spécial qui est échangeable avec le pare-brise normal.

SIEGES. Sièges individuels, dont le coussin s'ouvre en avant pour accommoder la capote et les batteries. Sièges réglables. Un couvre-tonneau est fourni.

CAPOUE. Capote en molleton de haute qualité, escamotable derrière les sièges, munie de fenêtres. Panneaux de tête amovibles se logent dans le compartiment de capote.

AGENCEMENT D'INTÉRIEUR. Le tableau à instruments et les ébénisteries sont finis en cuir de haute qualité. Podestes et portes à capotage.

ROUT DE SECOURS ET OUTILLAGE. Le route de secours est logée dans un compartiment spécial au-dessous du coffre à bagages. Les outils et le crié sont logés dans un récipient au côté du coffre à bagages, et le vilebrequin à roue se loge dans le compartiment de la route de secours.

COFFRE A BAGAGES. Un important coffre à bagages est prévu dans la partie arrière de la voiture, à éclatement automatique.

CRIC. Un vérin central à chaque côté de la voiture soulève les deux roues en même temps avec un minimum d'effort.

DIMENSIONS. Empattement, 2,59 m. ; voie avant, 1,29 m. ; voie arrière, 1,26 m. ; longueur totale, 4,27 m. ; largeur totale, 1,56 m. ; hauteur (sur capote), 1,32 m. (sur pare-brise, 1,27 m.) ; garde du sol, 180 mm. ; rayon de virage (à vide), 9,45 m. ; poids à vide, 1,218 kgs.

EQUIPEMENT ALTERNATIF. Pour les réunions sportives un réservoir d'essence de 109 litres de capacité et deux roues de secours peuvent se livrer avec la voiture. Ce n'est pas généralement recommandé à cause de la grande diminution de l'accommodation pour bagages.

SUPER SPORT TYP XK 100

2 LITER

Allgemeine Angaben

MOTOR. 4 Zylinder mit 2 obenliegenden, durch eine Doppel-Rollenkette angetriebenen Nockenwellen im Winkel von 70°. 2 Liter Jaguar Motor, 83 mm. Bohrung, 91 mm. Hub, 1.970 cm³ Brennraum, 105 PS. bei 5.000 U/min., 5,000 kg. Gewicht. Direkteinspritzung, Ventil mit "Auxinter" Gussguss-Ventildecke. Uebersetzungsverhältnis: 7 oder 8 : 1, Zylinderblock aus hochwertigem Grauguss. Wasserkirculation durch Pumpen und By-Pass-System und Thermostat-Regelung. Zylinderkopf aus hochwertiger Aluminiumpulverlegierung mit runden Verbrennungskammern ; Pistons aus Aluminiumlegierung ; Leichtmetall-Pleuelstange ; mit Öl Arbeitsseite Schaltölpumpe, schweflige Selenitversiegelung. Drosselklappe angehoben, zirkuliert durch einen Filter. Lubrifikation konstant ; Doppelvergaser mit automatischer, elektrisch betätigter Anlasserschlüssel. Ausblancierter Kurbelwelle, dreimal gelagert mit 70 mm. Durchmesser. Präzisionslager mit Stahlschalen.

RAHMEN. Ganzfeste Stahlkarosserie von ausserordentlicher Festigkeit und Steifheit. Durch Querversteifungen mit U-Profil von 180 mm. Höhe und vorderen Kastenquerträger wird Torsionsfestigkeit gewährleistet.

KRAFTÜBERTRAGUNG. Viergang-Synchrongetriebe mit Schrägaufzähnung, in Nadelrollen laufend, 2,3, und 4. Gang synchronisiert. Uebersetzungsverhältnis: 1 Gang, 1,379 ; 2 Gang, 8,1 ; 3 Gang, 5,59 ; 4 Gang, 4,3. (Hinterachsverhältnisse: 4,5 ; 4,0 ; oder 3,64). Kardanwelle mit "Hardy Spicer" Nachlauf-Lagerring. Einplattenkupplung 100 mm. Breite, mit Kupplungsscheibe aus Gummisilikon.

ABFEDERUNG. Vier unabhängige Einzelradförderung durch Torsionsstab und hydraulische Teleskop-Stossdämpfer. Hinten halbelliptische Längsfedern aus Silizium-Manganstahl in Verbindung mit hydraulischen "Girling"-Stossdämpfern, Typ PW7.

BREMSEN. Hydraulische "Lockheed"-Bremsen mit zwei geschobenen Bremsheben und Brems-Trommel von 305 mm. Durchmesser. Bremsbelägleiche, 1,32 cm². Vordere Trommeln sind mit Kühlrippen versehen. Die Handbremse wird durch besondere Gestänge nur auf die Hinterläufe.

LENKUNG. Lenkung mit "Burman", die bei allen Geschwindigkeiten leicht zu bedienen ist und aber ein unangenehmer Arbeit. Versellbares "Bluemel"-Lenkrad. Rechte oder Linkshandsteuerung.

LENKERUNG. "Burman" der tipo de volante de recirculación, positiva y segura a todas velocidades ; volante de dirección de 450 mm. de diámetro. Dirección a izquierda o a derecha.

RÄDER UND REIFEN. Keitige Press-Stahl-Schiessräder mit Bolzenfestigung. Breitreifen passend für "Dunlop" Reifen 6,00 x 16.

BRENNSTOFFVERSORGUNG. Die elektrisch arbeitende Pumpe fördert den Brennstoff aus dem hintenliegenden, 63,5 ltr. fassenden Behälter mit Reserveschub. Die Benzinfüllstellen sind im hinteren Kotflügel verdeckt untergebracht.

ELEKTRISCHE AUSRÜSTUNG. "Girling" "Lucas de Luxe" 12 Volt, 64 Amp. bei 10 Stunden Entladung. Eingebauter Scheinwerfer, Stoßlampe in den Kotflügeln. Stopplampe zum Rückwärtsgang, doppelter Rücklicht, Instrumentenbrett-Licht ; zwei abgestimmte Signallampen, Doppelscheibenwischer, Zugarennzähler, Anlassmotor, Vacuum und centrifugal automatische Zündverstärkung.

INSTRUMENTE. Bis 193 Km./h. ansteigender Geschwindigkeitsmesser von 125 mm. Durchmesser. Tachometer von 125 mm. Durchmesser ; Ampermeter ; Odometer ; Wechselseitiges Spannungsmeßgerät ; Batterietester ; elektrische Uhr.

HEIZUNGSANLAGE. Auf Wunsch, und mit einem Preiszuschlag, kann der Wagen mit Heizungs-System versehen werden.

KAROSSE. Aerodynamische 2-Plätzer-Karosserie mit erstklassigem Lederpolyester. Fußboden ist mit einem dicken, filzunterpolierten Teppich bedeckt. Für Rennen, liefern wir mit dem Wagen eine spezielle Windschutzscheibe, welche sich mit der normalen Windschutzscheibe austauschen lässt. Ebenso kann, auf Wunsch des Käufers, mit einem 109 Lit. fassenden Benzinkessel, über zwei neu entwickelte Ventile, versorgt werden. Im Allgemeinen, ist diese Art der Verkleidung des Gepäckraums nicht zu empfehlen.

SITZE. Einzel verstellbare Fauteuils. Aufklappbare Rücklehne mit einem separaten Ablauf für Verdeck und Batterie. Tonneau-Ueberzug wird mitgeliefert.

VERDECK. Aus erstklassigem Mohairstoff ; wenn ausser Gebrauch, das Verdeck ist hinter der Rücklehne verpackt. Unterziehliches Rückfenster, Abnehmbare Seitenfenster, die sich im Verdeckabdeck unterbringen.

INNENAUSSTATTUNG. Instrumentenbrett und Zierleisten aus erstklassigem Leder. Große Taschen an den Türen.

RESERVEFASS UND WERKZEUG. Das Reservoir befindet sich in einer besonderen Abteilung unter dem Gepäckraum und ist leicht zugänglich. Die Werkzeuge sind getrennt in einem besonderen, schalldichten und mit automatischer Beleuchtung versehenen Behälter im hinteren Gepäckraumdeckel untergebracht.

GEPÄCKKUNTERBERGUNG. Grosser Gepäckraum befindet sich hinten im Wagen. Automatische Beleuchtung ist versehen.

LEICHTES HEBEN. Jedes Rad lässt sich mittels einer Speziellhebevorrichtung mühsam vom Boden abheben.

HAUPTABMESSUNGEN. Radstand, 2,59 m. ; Spur vorne, 1,29 m. ; Spur hinten, 1,26 m. ; Totallänge, 4,27 m. ; Totalbreite, 1,56 m. ; Totalhöhe, 1,27 m. ; Bodenfreiheit, 180 mm. ; Wendekreis, 9,45 m., Gewicht, ca. 1,218 kg.

EQUIPEMENT ALTERNATIF. Pour les réunions sportives un réservoir d'essence de 109 litres de capacité et deux roues de secours peuvent se livrer avec la voiture. Ce n'est pas généralement recommandé à cause de la grande diminution de l'accommodation pour bagages.

SUPER SPORT TIPO XK 100

2 LITROS

Especificación General

MOTOR. Jaguar 2 litros ; de cuatro cilindros con árboles de levas dobles en la cabeza a 70° de inclinación, accionadas por cadena de rodillos de dos etapas ; diámetro de los cilindros 83 mm. ; longitud de los cilindros 105 mm. ; diámetro de la boquilla 5,000 mm. ; diámetro del tubo de escape 56 mm. ; diámetro de las turbinas al final de la tubería de escape 56 mm. ; válvulas grandes accionadas directamente con asientos de hierro fundido "Austinter" ; relación de compresión 7 ó 8 a 1 ; block de cilindros de hierro fundido del más alto grado ; enfriamiento por bomba, circulación controlada por termostato ; cabeza de cilindros de aleación de aluminio de gran grado de duración económica ; combustión eficiente ; sistema de regulación de la admisión de aire en la parte trasera ; lubrificación constante y fuerte por medio de bomba sumergida a través de un filtro de succión totalmente flotante ; carburadores dobles "S.U." de acción horizontal con cebador controlado electricamente ; cigüeñal contrabalanceado de 70 mm. de diámetro sobre tres cojinetes de aceite revestidos de metal.

BASTIDOR. Armazón de acero plano de perfil cuadrangular de gran resistencia y rigidez. Unos tirantes cruzados acanalados de 180 mm. de profundidad y un travieso frontal cuadrangular, asegurando la rigidez torsional.

TRANSMISION. Cambio con cuatro velocidades a engranajes helicoidales simples reforzados, montados en un rodillo de agujas, con segunda, tercera y directa sincronizadas. Relaciones de engrase : primera, 13,79 ; segunda, 8,1 ; tercera, 5,59 ; directa, 4,3 a 1. (Relaciones opcionales del eje trasero: 4,5; 4,0; 3,64). Eje propulsor "Hardy Spicer" con cojinetes de agujas a rodillo ; plato de embrague seco y simple de 254 mm. de diámetro "Borg & Beck."

Palanca ubicada en el centro accionando los cambios por control remoto.

SUSPENSION. Suspensión delantera independiente, mediante de barras de torsión y horizontales, y una barra transversal de torsión de gran resistencia y rigidez.

FRENOS. "Lockheed" completamente hidráulicos de dos zapatas y tambor de delanteros de 305 mm. de diámetro con dispositivo de enfriamiento. Superficie de fricción 1,3 2 centímetros cuadrados. Freno de mano accionado por palanca que acciona sobre las ruedas traseras solamente y por articulación separada.

DIRECCION. "Burman" del tipo de bola de recirculación, positiva y segura a todas velocidades ; volante de dirección de 450 mm. de diámetro. Dirección a izquierda o a derecha.

RUEDAS Y NEUMATICOS. Ruedas abombadas de radios de acero prensado con base ancha de llanta y ancho de radios, y neumáticos Dunlop "6,00 - 16".

SISTEMA DE ALIMENTACION DE COMBUSTIBLE. Por medio de una bomba "S.U." eléctrica de gran rendimiento, desde un tanque en la parte trasera de 63,5 litros de capacidad con dispositivo de reserva de nafta y luz de advertencia. El cargador de nafta está escondido en el guardabarros trasero y provisto de cerradura y llave.

EQUIPO ELECTRICO. Totalmente "Lucas" de 12 volts con luces gemelas de 64 amperes hora, diodo de cristal para el encendido, interruptor de descarga para las principales distancias y luces emisoras en la parte trasera ; luz de "Stop" para marcha atrás ; luces gemelas trasera ; luz de tablero ; dos bobinas gemelas de sonido armónico ; limpia parabrisas dual ; encendedores de cigarrillos ; motor de avance de ignición automático, centrifugo y al vacío.

INSTRUMENTOS. Velocímetro de 125 mm. de diámetro ; ampermetro ; manómetro de presión de aceite ; indicador termométrico de temperatura ; indicador de nafta con luz de advertencia ; reloj eléctrico.

CALEFACCION DEL COCHE. Un aparato de calefacción del interior del coche puede ser adquirido con el costo de 100 litros de gasolina.

CARROCERIA. Estilo aerodinámico, de dos asientos, totalmente tapizado empleando la mejor calidad de cuero. Las alfombras del piso están atornilladas sobre una superficie cubierta de fieltro. Para las carreras hay en el equipo un paraviento especial que puede ser intercambiado con el paraviento normal.

ASENTIOS. Asientos ajustables independientes ; capota y batería van colocadas detrás del respaldo.

CAPOTA. La capota de pelo de camela de gran calidad, se aloja detrás de los asientos cuando no esté en uso, a la vez tasaña inmóvil. Las ventanillas laterales desmontables van colocadas en el compartimento de capota.

GUARDINICIONES INTERIORES. El tablero de instrumentos y guardiniciones interiores adoradas de la mejor calidad de cuero ; bolígrafos de las puertas de gran tamaño.

RUEDA AUXILIAR Y HERRAMIENTAS. La rueda auxiliar va alojada en un espacio especial debajo del baúl y fácilmente accesible. Las herramientas y el cricote están colocados en una caja especial montada al lado del baúl, y el berbigón en el compartimento de la capota.

COMPARTIMENTO DE EQUIPAJES. Un amplio compartimento para equipajes está colocado en la parte trasera del coche, con acceso por la parte trasera.

SISTEMA DE CRIQUE. Cricote de fácil elevación y manejo sencillo, que se aplica en puntas especiales colocados en cada lado del chasis. Ambas ruedas se levantan simultáneamente.

DIMENSIONES PRINCIPALES. Distancia entre ejes, 2,590 mm. ; trocha trasera, 1,29 mm. ; trocha delantera, 1,26 mm. ; Total largo, 4,27 m. ; anchura total, 1,56 mm. ; alto total, 1,270 mm. ; espacio libre desde el suelo, 180 mm. ; radio de viraje, 9,45 m. ; peso del coche vacío, 1,218 kilos aproximadamente.

EQUIPO ALTERNATIVO. Para las reuniones deportivas un depósito de gasolina de 109 litros de capacidad, y dos ruedas de repuesto pueden suministrarse con el coche. En general no se recomienda por causa de la disminución del espacio disponible para equipajes.

SALIENT FEATURES OF THE MARK V JAGUAR

By W. M. HEYNES, M.I.Mech.E., M.S.A.E.

Chief Engineer, Jaguar Cars Ltd.

THE following brief outline is confined to technical aspects of the new Mark V Jaguar chassis; the appearance, furnishings and appointments of the entire car being immediately apparent upon examination.

The frame of the Mark V is scientifically designed and, for its weight, is probably the most rigid frame incorporated in any passenger car. The side members, which take the beam loading, are straight in both planes, which eliminates any torsional deflection due to direct bending loads. They have a maximum section at the dash line of $6\frac{1}{2}$ " deep by $3\frac{1}{2}$ " wide, tapering away to the front and the back. Torsional rigidity is supplied by the 7" deep channel section cross bracing which takes the torsional load from corner to corner in direct bending.

In addition, a heavy box section front cross member, which is also straight and in the same plane as the side members, gives the maximum possible rigidity to the front end. The rear of the frame is swept up over the rear axle to allow for the increased axle movement required by the more flexible suspension. Electric arc welding is extensively used at all major joints, and finally the complete frame is given a special protective treatment against rust or corrosion.

Independent front wheel suspension is introduced by Jaguar for the first time on the Mark V chassis. The original designs were carried out in 1938, and continuous tests and development work has been carried on throughout the ensuing period. The following notes indicate the salient points of the new suspension system:

(1) The wheels are controlled by transverse wish-bones, rigidly mounted above and below the main side member section.

(2) The spring is in the form of a silico-manganese steel torsion bar, over 51" long. The advantage of this type of springing over other forms is the accuracy with which it may be manufactured, and the complete absence of friction. The exceptional length of the spring permits a low stress to be used and ensures practically unlimited life.

(3) The stub axle is carried on ball joints at the outer end of the top and bottom wish-bone. These joints are naturally self-adjusting and eliminate the trouble frequently experienced with other forms of front axles where slackness, or play, can develop in the knuckle joints. Furthermore, the ball pins have a hard chrome surface and the cup is in a special graphite bronze. This combination gives an ideal bearing surface, capable of withstanding extreme abuse and retaining its extraordinarily low coefficient of friction under all conditions, ensuring accuracy and lightness in steering control.

(4) The mounting of the torsion bar is arranged so that this is entirely free from any bending stress caused by braking or any other extraneous force. The mounting is also such that a bar can be rapidly changed without disturbing any other part of the suspension. The screw adjustment at the rear end of the bar is provided so that the bar can be correctly tensioned without the use of any special equipment.

(5) Hydraulic shock absorbers act directly on the main suspension arm, ensuring the exact degree of fluid friction necessary to damp out the excess movement.

(6) The lower wish-bone is constructed of a deep "I" section steel forging which carries the load to the torsion bar. This is braced by a strong tubular strut, giving wide base mounting into the frame.

(7) The stub axle shaft is a high tensile steel stamping, securely fixed on a taper into the stub axle carrier, which eliminates the high stress of the sharp corner which always occurs with a single-piece forging. This shaft carries the hub on two large taper roller bearings, adequately sealed against dirt or moisture.

The design of the Jaguar independent front suspension has been perfected only after due consideration of other factors affecting comfort, ease of control and stability. Thus, special attention has been given to the rear suspension which is by long flexible leaf springs having periodicity rates balanced with those of the front suspension. Further, the large section Dunlop super-comfort tyres $6.70 \times 16\frac{1}{2}$, fitted on 5" wide base rims, afford the maximum cushioning effect combined with complete stability under stress of cornering at high speed.

The combination of all the foregoing points of design connected with suspension results in a soft ride with a complete absence of pitch or bounce. Moreover, the road holding and cornering stability, which has for so long characterised the Jaguar, is not only retained but is actually improved.

Burman recirculating ball type steering is employed. This high efficiency steering gives effortless operation and at the same time positive control at the high speeds of which the car is capable. The box is rigidly mounted on the suspension posts far forward, giving the ideal steering wheel position which has always been a characteristic of the Jaguar car. A single tube connects the steering drop-arm to the idle lever on the other side of the chassis. From the end of this tube, short links, accurately set to length to ensure ideal steering geometry, connect to the short stiff steering arms mounted on the stub axle. Although the steering is light and accurate at high speeds, there is an entire absence of steering kick.

The full hydraulic braking system incorporates the two leading shoe principle and operates on all four wheels. Hydraulic application ensures that the correct balance of braking effort is applied at each wheel without the frictional variations which can occur on mechanically operated systems. The large area of the friction surface (184 sq. ins. lining area) (340 sq. ins. working drum area) ensures long life and freedom from fade, even under the most exacting conditions. A hand lever operates the rear wheel brakes through an entirely separate linkage.

The four-speed single helical box embodies a number of internal improvements in design which ensures silence and complete immunity from the troubles which are often associated with transmission. The intermediate gears and layshaft are mounted on needle roller bearings, whilst two large ball bearings and a roller bearing carry the primary and main shaft. The reverse shaft has been stiffened up and the bearing increased in diameter. A two-piece propeller shaft enables a flat floor line to be used in the rear of the car, the centre bearing being insulated in rubber against noise or vibrations.

Representing, as it does, long years of development and trial, the Jaguar Mark V is presented with pride and confidence as a worthy successor to a car which has fully earned the description of being the finest car of its class in the world.

NOTES ON THE JAGUAR XK TYPE ENGINE

By W. M. HEYNES, M.I.Mech.E., M.S.A.E.

Chief Engineer, Jaguar Cars Ltd.

In this new range of Jaguar engines all compromise in design has been eliminated. Each engine can be truthfully stated to incorporate all the most advanced technical knowledge available to-day on naturally aspirated petrol engines. Tests carried out on the completed units have shown the wisdom of the decision taken by the Jaguar Company nearly nine years ago to develop an engine on these lines.

In addition to bench tests, totalling many thousands of hours, extensive road tests at home and abroad have been carried out, and it is significant that the 2 litre engine, loaned to Colonel Gardner when he broke the world speed record in the 2 litre class at 176 miles per hour, is a completely standard unit with the exception of modified pistons to give a higher compression ratio. Further proof of the high efficiency of the XK engine was provided on the 30th of May, 1949, when an entirely standard production 3½ Litre Model running on pump petrol obtained a speed of 132½ m.p.h. under the official observation of the Royal Automobile Club of Belgium. This speed is the highest ever recorded by a standard production car.

From the following condensed resume of the more important features of the Type XK engine, it will be seen that no reliance has been placed upon the use of new or untried inventions. Instead, a blend of known and proved detail designs of the highest efficiency has resulted in the creation of a production engine of unparalleled quality and performance.

The following are some of the more important points:

(1) Hemispherical head of high strength aluminium alloy with large diameter valves set 70°; the sparking plugs are disposed on the engine centre line in the path of the incoming gases. This ensures complete and rapid burning of the mixture, and ensures regular firing at slow speed pulling or maximum r.p.m.

VALVE SEATINGS.

(2) These are of special high expansion cast-iron in which the coefficient of expansion approximates to that of the alloy cylinder head. This construction ensures a rapid flow of heat from the valve seat, eliminating local over-heating and giving an exceptional life to both valves and seatings.

INDUCTION SYSTEM.

(3) The valve ports and induction system have been designed in collaboration with Mr. Harry Weslake (generally accepted as the foremost expert in this science) and combine large induction passages, which offer a minimum restriction to flow, with specially contoured ports which ensure a controlled degree of turbulence in the combustion chamber.

TWIN OVERHEAD CAMSHAFTS

(4) Twin overhead camshafts, driven by two-stage chains, act directly on the valves through floating tappets. This reduces to a minimum the unsprung weight of the valve parts and enables extremely light valve springs to

operate satisfactorily up to the high maximum r.p.m. In addition, the absence of rockers and push rods eliminate the main source of wear and noise often associated with overhead valve mechanisms. The camshaft and tappet face are submerged in an oil bath formed in the cylinder head casting, which forms an oil cushion between the two working surfaces.

OILING SYSTEM.

(5) Large capacity oil pump is driven by skew gears on the front of the crankshaft and picks up oil from the sump through a floating strainer, which avoids cavitation, whilst the strainer ensures that no particles of dirt can enter the oiling system. On the delivery side of the pump all the oil is passed through a full-flow pressure filter and from there into a 3" diameter gallery, which runs the full length of the engine and from which distribution throughout the engine is taken.

COOLING SYSTEM.

(6) Water circulation is supplied by high pressure centrifugal pump on the input side of the engine. This avoids any chance of steam pocketing, which can occur when the pump is used as an extractor. The water is fed from the pump down a separate gallery on the nearside of the cylinder block, and jets are directed on to the exhaust valve seatings and so across the head, around the sparking plugs, past the inlet valves, and passing out to the radiator through a gallery cast integral with the induction pipe. The block is cooled by a restricted circulation which gives a quick warm-up and maintains an efficient operating temperature under running conditions. The radiator block is of a film interspacer type and is fitted with a thermostat control with a by-pass which controls the engine temperature.

CRANKSHAFT.

(7) High tensile alloy steel forging with balance weights forged integral with the webs. The seven main bearings on the six-cylinder engines and the three main bearings on the four-cylinder engines are of 2½" diameter. The exceptionally large diameter of these bearings and the resulting crank rigidity are responsible to a large degree for the extreme smoothness with which these engines deliver their power, even up to the high maximum r.p.m. of which they are capable.

BEARINGS.

(8) The bearings are the Vandervell thin steel shell white metal lined type for crankshaft, connecting rods and camshaft bearings, and although these are precision made and completely interchangeable without fitting, they have proved to give practically unlimited life under most exacting test conditions.

PISTONS.

(9) High strength aluminium alloy fitted with two narrow compression rings, the top ring being chromium plated to eliminate corrosion and consequent wear and, in addition, a slotted oil control ring is also fitted.

CONNECTING RODS.

(10) Steel "H" section forging drilled up the centre web to provide oil feed to small end. The big end and cap are well ribbed to give rigidity and maintain true circular form under working stresses.

3½ LITRE Specification SALOON

● Traduction Française page 22 ● Deutsche Uebersetzung Seite 22 ● Traducción Española pagina 22

ENGINE. Six cylinder Jaguar Mark V 3½ litre; 52 mm. bore x 110 mm. stroke; 3,485 c.c. developing 125 b.h.p. at 4,250 r.p.m.; overhead large diameter valves, push-rod operated; 2½ ins. diameter counter-weighted crankshaft carried in seven large precision made steel-backed bearings; two SU carburetors; all-steel three-piece cylinder head; detachable head; compression ratio 6.75:1; cooling by pump circulation with by-pass thermostat control; submerged oil pump; forced lubrication throughout; complete circulation through full flow oil filter; special Lucas de luxe coil and distributor ignition system; twin S.U. carburetors with electrically controlled automatic choke.

FRAME. Straight plane steel box section frame of immense strength and stiffness. Torsional rigidity is ensured by 7 ins. deep channel cross bracing with heavy box section front cross member.

TRANSMISSION. Four-speed synchronesh gearbox of improved design. Single helical gears with strengthened teeth mounted in massive case. Gear ratios 1st 14½:1, 2nd 8.52:1, 3rd 6.57:1, 4th 4.3:1. Hardy Spicer all metal divided propeller shaft; Borg & Beck 10 ins. diameter single dry plate clutch. Centrally placed gear lever with remote control.

SUSPENSION. Independent front suspension incorporating wishbone and torsion bar principle. Direct acting hydraulic shock absorbers. Rear suspension by long silico-manganese steel leaf springs with blades squared and tapered to give flexibility and silence in operation, controlled by piston type dampers. Rear springs totally enclosed in gaiters fitted with grease nipples.

BRAKES. Full hydraulic two-leading-shoe brakes with 12 ins. diameter high duty iron drums, 2½ ins. wide. Friction lining area, 184 square inches. Front drums fitted with cooling ducts. Pistol grip handbrake on rear wheels only through separate linkage.

STEERING. Burman re-circulating ball type steering, light yet accurate at all speeds. Bluebel 18° adjustable steering wheel. Left or right hand steering optional.

WHEELS AND TYRES. Heavily dished pressed steel bolt on type with wide base rims carry Dunlop super comfort 5½-70 ins. x 16 ins. tyres.

FUEL SUPPLY. By electric pump from 14 gallon rear tank with reserve supply and warning light. Petrol filler cap concealed in rear wing and fitted with lock.

ELECTRIC EQUIPMENT. Lucas de luxe 12

volt set with ventilated dynamo; 64 amp. capacity battery, 10 hour discharge; built-in head lamps and wing lamps; two fog lamps; stop light; reverse light; twin rear lights; two interior lights with extra door-controlled interior illumination; twin blended-note horns; twin-bladed screen wiper; cigar lighter.

INSTRUMENTS. 5 ins. diameter 120 m.p.h. speedometer, with headlamp beam warning light, 5 ins. diameter revolution counter, ammeter, oil pressure gauge, water temperature gauge, petrol gauge, clock, self-cancelling trafficators with warning light.

AIR CONDITIONING. Built-in air conditioning unit incorporating de-froster and de-mister. Improved system of induction provides cold filtered air taken from outside car for ventilating the interior during hot weather and fresh warm air for cold conditions.

UPHOLSTERY AND CARPETING. Upholstered throughout in finest quality Vaumol leather hide and Dunlopillo. Flat floor is thickly carpeted over felt underlay.

SEATING. Front bucket seats adjustable for height and reach. Heavily padded folding central arm-rest in rear compartment.

INTERIOR APPOINTMENTS. Garnish rails, window frames and instrument panels are of fine quality wood in polished figured walnut finish, press button door handles, capacious soft leather door pockets with zip fasteners, large cubby lockers, ventilator windows in front and rear compartments, glove drawer, ash trays.

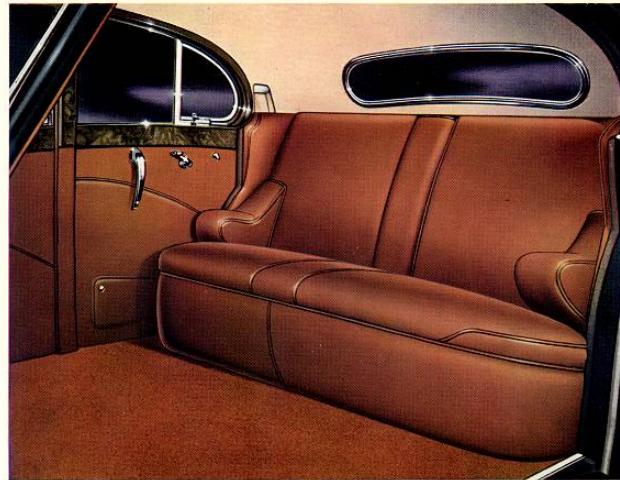

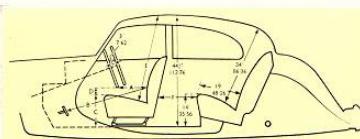

SPARE WHEELS AND TOOLS. Spare wheel is carried in special compartment beneath luggage locker. Tools are housed individually in specially shaped soundproof container in rear locker lid fitted with automatic light.

LUGGAGE ACCOMMODATION. Ample accommodation is provided in the large rear locker, the lid of which may be lowered to form platform for additional luggage. Platform and locker interior highly polished and fitted with raised rubber protector strips.

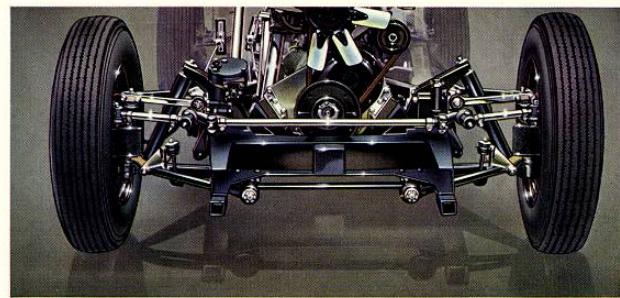

EASY JACKING. Any wheel may be raised clear of the ground with the minimum of effort by means of special easy-lift jack.

PRINCIPAL DIMENSIONS. Wheel base, 10 ft. 0 ins.; track front, 4 ft. 8 ins.; rear, 4 ft. 9½ ins.; overall length, 15 ft. 7½ ins.; overall width, 5 ft. 9 ins.; overall height, 5 ft. 2½ ins.; unladen turning circle, 35 ft. 0 ins.; dry weight, 33 cwt. (approx.).

WHEELS AND TYRES. Heavily dished pressed steel bolt on type with wide base rims carry Dunlop super comfort 70 ins. x 16 ins. tyres.

FUEL SUPPLY. By electric pump from 14 gallon rear tank with reserve supply and warning light. Petrol filler cap concealed in rear wing and fitted with lock.

ELECTRIC EQUIPMENT. Lucas de luxe 12

volt set with ventilated dynamo; 64 amp. capacity battery; 10 hour discharge; built-in head lamps and wing lamps; two fog lamps; stop light; reverse light; twin rear lights; two interior lights with extra door-controlled interior illumination; twin blended-note horns; twin-bladed screen wiper; cigar lighter.

INSTRUMENTS. 5 ins. diameter 120 m.p.h. speedometer, with headlamp beam warning light, 5 ins. diameter revolution counter, ammeter, oil pressure gauge, water temperature gauge, petrol gauge, clock, self-cancelling trafficators with warning light.

AIR CONDITIONING. Built-in air conditioning unit incorporating de-froster and de-mister. Improved system of induction provides cold filtered air taken from outside car for ventilating the interior during hot weather and fresh warm air for cold conditions.

UPHOLSTERY AND CARPETING. Upholstered throughout in finest quality Vaumol leather hide and Dunlopillo. Flat floor is thickly carpeted over felt underlay.

SEATING. Front bucket seats adjustable for height and reach. Heavily padded folding central arm-rest in rear compartment.

INTERIOR APPOINTMENTS. Garnish rails, window frames and instrument panels are of fine quality wood in polished figured walnut finish, press button door handles, capacious soft leather door pocket with zip fasteners, large cubby lockers, ventilator windows in front and rear compartments, glove drawer, ash trays.

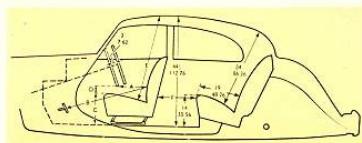

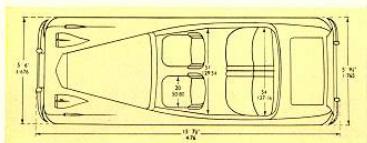

SPARE WHEELS AND TOOLS. Spare wheel is carried in special compartment beneath luggage locker. Tools are housed individually in specially shaped soundproof container in rear locker lid fitted with raised rubber protector strips.

LUGGAGE ACCOMMODATION. Ample accommodation is provided in the large rear locker, the lid of which may be lowered to form platform for additional luggage. Platform and locker interior highly polished and fitted with raised rubber protector strips.

EASY JACKING. Any wheel may be raised clear of the ground with the minimum of effort by means of special easy-lift jack.

PRINCIPAL DIMENSIONS. Wheel base, 10 ft. 0 ins.; track front, 4 ft. 8 ins.; rear, 4 ft. 9½ ins.; overall length, 15 ft. 7½ ins.; overall width, 5 ft. 9½ ins.; overall height, 5 ft. 2½ ins.; unladen turning circle, 35 ft. 0 ins.; dry weight, 33 cwt.s. (approx.).

F	18	45·72	9	22·86

The capacious luggage compartment is fitted with rubber protector strips, the lid forming a platform for additional luggage. Tools are carried in the lid (see page 8).

Instrument panels of all closed models are of steamed wood with polished figured walnut finish. The glove drawer at the bottom centre can be removed to accommodate wireless control panel.

3½ LITRE Specification COUPÉ

● Traduction Française page 22 ● Deutsche Übersetzung Seite 22 ● Traducción Española pagina 22

ENGINE. Six cylinder Jaguar Mark V 3½ litre, .02 mm. bore > 110 mm. stroke; 3,405 c.c., developing 125 b.h.p. at 4,250 r.p.m.; overhead large diameter valves, push-rod operated; 2½ ins. diameter counter-weighted crankshaft carried in seven large precision made steel backed bearings; connecting rods of light alloy; chrome-iron cylinder block; cylinder heads of light alloy; cooling system by oil pump and fan with by-pass thermostat control; submersible oil pump; forced lubrication throughout; complete circulation through full flow oil filter; special Lucas de luxe coil and distributor ignition system; twin S.U. carburettors with electrically controlled automatic choke.

FRAME. Straight plating steel box section frame of immense strength and stiffness. Torsion rigidity is ensured by 7 ins. deep channel cross bracing with heavy box section front cross member.

TRANSMISSION. Four-speed synchronesh gearbox of improved design. Single helical gears with strengthened teeth mounted in needle roller bearings. Ratios: 1st 14½; 2nd 8½; 3rd 5½; top 4½. Handily Spee's all metal divided propeller shaft; Borg & Beck 10 ins. diameter single dry plate clutch. Centrally placed gear lever with remote control.

SUSPENSION. Independent front suspension incorporating wishbone and torsion bar principle. Disc spring hydraulic shock absorbers. Rear suspension by long silico-manganese steel springs with blades spaded and tapered to give flexibility and silence in operation, controlled by piston type dampers. Rear springs totally enclosed in gaiters fitted with grease nipples.

BRAKES. Full hydraulic two-leading-shoe brakes with 12 ins. diameter high duty iron drums, 2½ ins. wide. Friction lining area, 184 square inches. Front drums fitted with cooling ducts. Pistol grip handbrake on rear wheels only through separate linkage.

STEERING. Worm recirculating ball type steering, light yet accurate at all speeds. Bluenet 18° adjustable steering wheel. Left or right hand steering optional.

WHEELS AND TYRES. Heavily dished pressed steel hub type with wide base rim carry Dunlop super comfort 6½ ins. x 16 ins. tyres.

FUEL SUPPLY. By electric pump from 14 gallon tank with reserve supply and warning light. Petrol filler cap concealed in rear wing and fitted with lock.
